

Can we make a truthful and complete statement on the label that correctly identifies the ingredients as certified organic by a foreign government and import it into the U.S. without being certified by an NOP accredited certifying agent?

No. To sell your product in the U.S. as "100% organic," "organic," or "made with organic [ingredients]," it must be certified to the NOP standards by an NOP-accredited certifying agent regardless of the country of origin. Certifications to other countries' standards or private standards are not recognized in the U.S.
